## 7 Electrical Characteristic

| Part NO.    | Inductance ( uH ) | Test conditions | Isat(A) Typ. | Irms(A) Typ. | RDC(mΩ) Max./Typ. | Marking |
|-------------|-------------------|-----------------|--------------|--------------|-------------------|---------|
| YMH1238R56M | 0.56±20%          | 100kHz, 1.0V    | 40           | 35           | 1.0/0.9           | R56     |

### Note:

- Irms: DC current (A) that will cause an approximate  $\Delta T$  of 40°C.
- Isat: DC current (A) that will cause  $L_0$  to drop approximately 30%.
- The part temperature (ambient + temp. rise) should not exceed 125 °C under worst case operating conditions.
- Temperature rise is highly depending on many factors, including PCB land pattern, trace size, and proximity to other components. Therefore temperature rise should be verified in application conditions.
